(3rd Position)

Courses

- | | |
|--|--------------------|
| - Advanced JavaScript | Udemy – 25.5 Hours |
| - NodeJS Advanced Concepts | Udemy – 16 Hours |
| - Blockchain A-Z | Udemy – 14.5 Hours |
| - AWS: Cloud Practitioner | Udemy – 15 Hours |
| - Microservices with NodeJS & ReactJS | Udemy – 54.5 Hours |

Initiatives

7Vals

- **Implemented Husky For Automation**

Implemented husky to prevent code push if any TS error occurs or any cyclic dependency exist on the code. It helps our code to be error free and prevent any cyclic dependencies to be pushed to the git repository

- **Use React With Rails**

Currently at 7vals, our product was implemented using simple html, css and javascript. They were not using any fronted framework and it was difficult to migrate that big product into React. I took the initiative to implement react with rails and migrate rails pages into rails. It helped better user experience throughout the product
